

U.S. Environmental Protection Agency Honors

GP has a long history of mutually beneficial collaborations with the EPA – from awards and recognition, to programs aimed at enhancing safety and reducing emissions at operating facilities.

5 CERTIFIED PLANTS

ENERGY STAR® certification is earned through adherence to strict EPA requirements. The energy performance of industrial facilities is compared nationally to similar operations. Only the top 25% become certified.

6 TOP PROJECTS

Business initiatives that demonstrate leadership and commitment to reducing emissions and meeting EPA energy design criteria are eligible for ENERGY STAR® recognition.

9 CHALLENGE FOR INDUSTRY ACHIEVERS

ENERGY STAR® Challenge for Industry is a global initiative for industrial sites to reduce their energy intensity by 10% within five years.

CERTIFIED PLANTS

Big Island Containerboard Mill

2024, 2025, 2026

Brewton Containerboard Mill

2021, 2022, 2023, 2024, 2025, 2026
