

SHAPING YOUR FUTURE WITH GENERATIVE AI

How Koch Interns Harness Generative AI (GenAI) to Own Their Role & Create Value

Immerse yourself in the leading technologies shaping the future of industries around the world. Our interns gain practical experience using GenAI to explore opportunities and help solve problems companywide.

GAIN HANDS-ON EXPERIENCE

Koch interns and employees receive access and training to leading GenAI tools they can use to solve real problems affecting our businesses.

DEVELOP IN-DEMAND SKILLS

From analyzing data to testing new processes, GenAI can be applied in various fields and disciplines to broaden your expertise.

BOOST CREATIVITY & INNOVATION

We encourage our interns to think outside the box to tackle real issues affecting Koch and our companies. And GenAI can help!

BECOME FUTURE-READY WITH GenAI

By embracing emerging technologies, our interns are better prepared for full-time careers and position themselves as future leaders.

At Koch, we believe that being an early adopter in GenAI allows us to gain competitive advantages. By providing interns with these tools, training and resources, we're helping set themselves up for long-term success.

"Before my internship, I viewed GenAI as a life hack. But after my internship, I realized it's not something to be feared. It's really a tool to leverage to be more efficient."

Jolie Abadi
