

Ariba Network Value

The Ariba Network is a third-party vendor that provides a platform to facilitate the exchange of documents (transactions) electronically between Georgia-Pacific and a supplier.

Georgia-Pacific suppliers on the Ariba Network should experience:

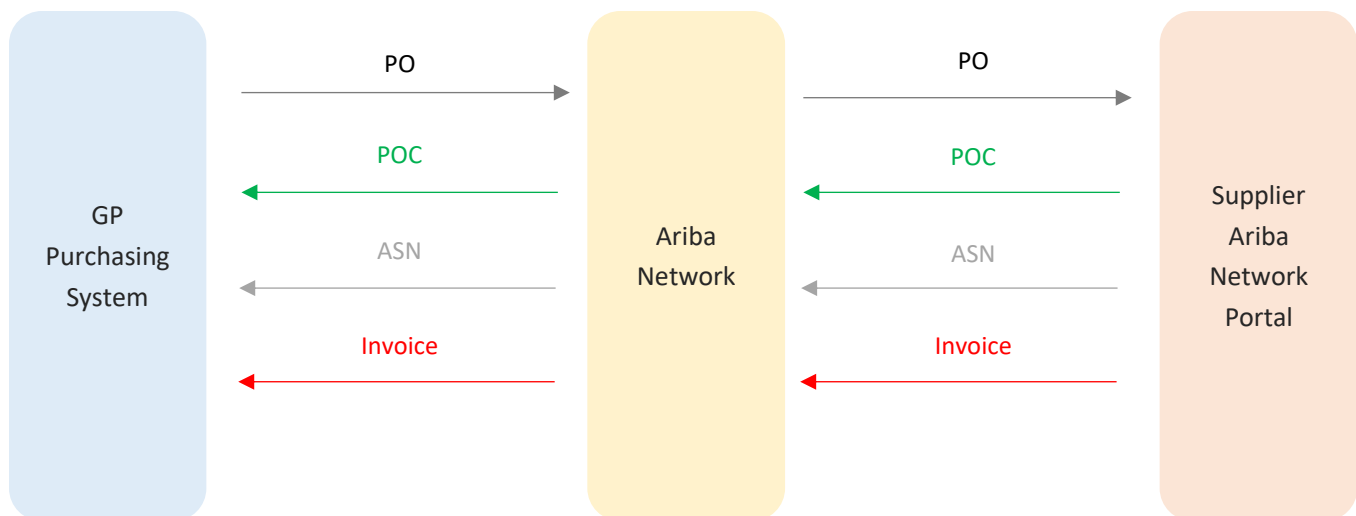

The Ariba Network makes fulfillment simply by making it easy:

You can implement end-to-end automation of your order management processes to collaborate with customers more efficiently and effectively on purchase orders (PO), purchase order confirmations (POC), advanced ship notices (ASN) and invoices.

When customers use Ariba Network to send POs, the orders are displayed in your account right away. You can then use your account to send POCs, ASNs and invoices back to your customers while ensuring all information is correct.

If you have any Georgia-Pacific related questions, please reach out to GP_Supplier_Enablement@gapac.com or visit our supplier portal GP.com/supplier
