

Turnkey Services

Our Full-Service Advantage

JZHC does more than design and manufacture industry-leading equipment. As part of Koch Engineered Solutions, we offer the world-class installation expertise of Koch Specialty Plant Services (KSPS). Let the KSPS team of experts install the equipment JZHC designs and manufactures for you.

A-To-Zink

By consolidating responsibilities, you can eliminate layers which contribute to cost overruns and delays. Partnering with KSPS, our capabilities include:

- + Construction management and field execution
- + Safety management
- + Quality management
- + Civil and structural engineering
- + Equipment installation
- + OSBL installation (civil, structural, mechanical, I&E, etc.)
- + Mechanical, electrical and control tie-ins
- + Lighting design and installation
- + Loop checks, commissioning and training

Retrofits And New Builds

Whether you are upgrading a current system, or building a greenfield project, we can provide turnkey services in support of all our product lines through KSPS. We'll handle installation and construction, along with a variety of other responsibilities, so you can minimize the number of participants in your project and streamline your efforts.

Safe And Sound

We go above and beyond to be safe. Both JZHC and KSPS operate OSHA-approved VPP sites because of the rigorous safety standards we employ. Our team brings that same safety focus to customer locations when executing construction projects using our turnkey services—providing safe work and peace of mind.

Whether you are upgrading your current system, or building a greenfield project, KSPS can provide turnkey services in support of all JZHC product lines.

Quality As Expected

Customers turn to JZHC for the proven quality in our equipment design and manufacturing. KSPS offers that same level of proven performance for installation. Working together, we offer the efficiencies and advantages of integrating equipment design and construction planning throughout every facet of your project.

Our turnkey services can be added to any project within our product lines, including:

- + Burners
- + Boilers
- + Flares
- + Flue gas treatment
- + Gas recovery
- + Landfill and biogas systems
- + Thermal oxidizers
- + Vapor control
- + Heat transfer
- + Oil, gas, and liquids separation, treating and conditioning
- + Combustion monitoring

Take the hassle out of your next project

with reliable turnkey services through KSPS. To learn more, contact us at **(713) 427 7700** or **kpsinfo@kochspecialty.com**.

Service And Support

Once your project is complete, you can rest assured we'll be there to help keep you up and running. Our worldwide service organization is the largest, most technically advanced team of its kind. JZHC technicians are trained in the latest technologies and can troubleshoot operations and help plan your next turnaround or outage. We offer preventative maintenance programs to reduce unplanned downtime, avoid possible emergency call-outs, and ensure maximum availability and extended operating life of your equipment.
