

Notice: GP Internal Entity Changes – U.S. Consumer Products

Effective January 1, 2022, Georgia-Pacific Consumer Operation LLC (“GP Consumer Ops”) is undergoing an internal restructuring to more accurately reflect how we organize and operate eight (8) of our consumer products mills. Rest assured, we value our relationships with our suppliers, and business will continue as usual.

For the most part, it’s unlikely suppliers will experience any impact. However, there may be a change to the GP Consumer Ops entity indicated on Purchase Orders issued for goods, equipment, and services at the eight (8) mills below **beginning January 1, 2022**. **Regardless, suppliers need only ensure, as always, that the GP legal entity indicated on the invoice and any related documentation for these eight (8) mills, including without limitation, any U.S. customs documentation, mirrors the GP legal entity on the corresponding Purchase Order.**

One area that may have a minimal impact on your company is the obtaining of sales tax exemption certificates from the new legal entities. If you make tax exempt sales, please contact your GP account contact to request new sales tax exemption certificates. The certificates you receive will be dependent on the number of Impacted Facilities your company sells to and the number of states to which your company ships its product.

Similarly, going forward, please use the mail, e-mail and fax number indicated in the “Bill to Information” section of the Purchase Order. Should you have any questions or concerns, do not hesitate to reach out to the GP contact listed on the face of the Purchase Order.

GP values our relationships with suppliers and appreciates your attention to this notice to ensure your documentation reflects the restructuring.
